

## Phase 2:

Title: Down Vote Button
As an authenticated user, I want a dislike/downvote button so that I can express my disinterest in a post
Manual Test: Given that I am on the app looking at a post when I do not enjoy a post and hit the dislike button then the like button changes colors and the number of total likes on the post is decremented by one.

Title: Account Safety
As an authenticated user, I don't want anyone who is not me to log into my account so that I can protect my account and information.
Manual Test: Given that I am someone who wants to log into a specific account, then I am unable to do so without proper verification.

Title: User Privacy
As an admin, I want to use OAuth account verification so that I can ensure the privacy of the users is protected.
Manual Test: Given that a user wants to log into an account when they go to do so they are taken to a connected OAuth site to do so then it is ensured the user's information is protected.

Title: User Information

As an admin, I want to collect and store information on a user such as their gender and sexual orientation so that we can create and advocate for an inclusive and accepting platform for all to use.

Manual Test: Given that a user wants to use the app when they create an account with us, then they will be asked to include their gender and sexual orientation which will be stored along with the rest of their account information.

Title: Authenticated Users

As an admin, I want users to have to log in before they can view posts so that I can keep track of who posts and accesses the app

Manual Test: Given that someone wants to use the app when they go onto the app, then they are asked to either login or create an account first

Title: Comment Section

As an authenticated user, I want a comment section added to each post so that I can express my thoughts on a post

Manual Test: Given that I am an authenticated user looking at a post when I have something to say on a post and hit the comment button, then I am able to add a

response that is linked to the original post to be seen by others.

Title: Edit Old Comments

As an authenticated user, I want to be able to go back and edit any comments that were previously made by me so that I can change my mind about the message

Manual Test: Given that I am an authenticated user who has previously made a comment on a post when I want to make a change to that comment then I can do so with an easy edit button that only I have access to
